** Completely open suction inlet

STANDARD FEATURES

- The STORM SV10 is provided with one carbon brush motor (direct cooling type). A sturdy plastic cover protects the motor, and reduces the noise to very low level. A foam filter reduces the noise more and secures the purity of the air on the exhaust.
- The vacuum can suck up dust or small solid material, the filter is made up of a collection removable paper bag, and a filter cartridge for dust.
- The body is made of PVC, and has a hard rubber protection all around, and turning wheels.
- The vacuum includes a kit of PVC accessories in 32 mm. size, including hand and floor nozzles, 2,5 mt. hose, and one spare collection bag.

OPTIONALS:

- HEPA filter cartridge
